

DO YOU CARE ABOUT SOFTWARE QUALITY?

Adaptive Regelsysteme GmbH (ADRESYS) is a subsidiary of OMICRON electronics GmbH. OMICRON, with over 1000 employees, develops and distributes testing, diagnostic and monitoring solutions. With COMPANO 100 ADRESYS has already developed a testing device for OMICRON. To further drive the development of our products, an additional team shall be built up in Salzburg. At our location in Oberndorferstraße 35/C, Austria we are therefore looking for a:

Software Developer with focus on test automation 80-100% (f/m/x)

What is it all about?

- You will be involved in product development from the very beginning - design, implementation and maintenance of tests and test infrastructure are among your main tasks
- You will implement and improve automated tests and create the requirements for them
- System and acceptance tests as well as the support of the product release cycle complete your tasks
- You contribute to the continuous improvement of our quality assurance and our products

What skills do you need to have?

- You have successfully completed an education in computer science or electrical engineering (university, university of applied sciences, technical college) and may even have some relevant professional experience
- You like programming, ideally have experience in Python and/or C# and are used to working with Linux
- You describe yourself as structured and conscientious and appreciate working autonomously
- You are interested in complex technical systems, have an eye for details and like to think "out of the box"
- You have a good command of English

What we offer?

- Job with meaning: make the energy supply more secure!
- Work flexibly: whether you're an early riser or a night owl, in the office or partly from home
- Work-life balance: fitness studio, mindfulness training and flexible working hours
- No hierarchy: coaches give freedom and encourage creativity
- Have fun: with us in the team and at the monthly get-together

If that sounds like a task that is designed for you – then apply via www.omicron.jobs
